

Protect The Land of Peace Between People, Nature and Animals!

- the land with a one-of-a-kind world of birds, bats and butterflies,
- the land for every species of animals that, free of fear, can live in dignity and peace,
- the land with woods, wetland biotopes, trees and shrubs, with healthy fields that have no chemicals, bordered by hedges and blooming borders,
- the land, which is a wellspring of health for body and soul,
- the land that, through peaceful animals and a nature lovingly cared for, provides healing powers for children and adults and, in line with a holistic therapy, has already healed many an emotional scar,
- the land that people have developed and continue to build on, and on which people of all cultures develop a relationship to nature and animals again,
- the land that conveys tranquility and peace – for many people it is the land of a New Era,
- the land, which, in distant countries, as well, serves as an example for a new, peaceable way of treating nature and animals – a worldwide hope for the Earth, which suffers unendingly under mankind,
- the land, which is known worldwide through the television programs, “Reports on the Land of Peace” and which can be viewed on: “Die Neue Zeit TV,” “Sophia TV” via Astra digital, as well as “Erde und Mensch” and “Sender Neu-Jerusalem” via Eutelsat/Hotbird and many other television stations all over the world.

It is the land of the International Gabriele Foundation for All Cultures Worldwide, which, with the Farm Terra Nova, is working for a global way of making amends, having the awareness that people, animals and plants are all creatures of God. This Land of Peace, which is in the proximities of Würzburg, Germany is now

threatened by a senseless traffic project that would destroy everything.

We will not allow this!
